

VÉLØ ORACLE PRIME — STRIKE RECOMMENDATIONS

Date: 08 March 2026

Meeting: Naas

Total Races: 5

EXECUTIVE SUMMARY

Strike Recommendations: $\frac{2}{5}$ races (40%)

Quarantines: $\frac{3}{5}$ races (60%)

Overall Assessment: The Naas card today presents significant challenges due to the **HEAVY** going, which has triggered the **Q5 Quarantine Gate** (Heavy/Soft going + 12+ runners) in the majority of the handicap races. The engine has correctly identified these as high-chaos environments where reliable prediction is compromised. Consequently, the strike rate is low, and confidence is capped at MEDIUM. The focus is on smaller field races or those with a clear form advantage that can cut through the noise.

NAAS (IRELAND)

Going: HEAVY

Surface: Turf

Strike Rate: 40% ($\frac{2}{5}$ races)

✓ STRIKE RECOMMENDATIONS

RACE 4 — 16:37 — BAR 1 Betting Beginners Chase (2m4f)

TOP STRIKE: Ballygunner Castle

Confidence: MEDIUM

Value Overlay: Ballygunner Castle **Danger:** Spread Boss Ted

Rationale: This race passes the quarantine gates due to the smaller field size (7 runners), mitigating the impact of the heavy going. **Ballygunner Castle** emerges as the top strike based on a strong hurdles rating (134) and a solid chasing debut at Punchestown. Despite a fall last time out, that was in a tougher contest, and the return to a Beginners Chase represents a significant class drop. The engine identifies a clear form and ability advantage over the rest of the field. Paul Townend's choice to stick with this horse is a strong positive signal.

Suppression Signals: S7 (Going Extreme) is active but overridden by the class differential and jockey confirmation.

RACE 5 — 17:12 — BAR 1 Casino Mares (Pro/Am) INH Flat Race (2m)

TOP STRIKE: Poetisa

Confidence: LOW

Value Overlay: Moyneard **Danger:** Kiltybo

Rationale: This bumper race is a conditional strike. **Poetisa** is selected based on her strong performance in hurdles, despite not being a natural jumper. Reverting to a bumper, where jumping is not a factor, should allow her class to show. She was a Cheltenham bumper winner and has faced high-quality opposition. The **Value Overlay** pick is **Moyneard**, who is entitled to improve significantly from her runner-up finish to Kiltybo, especially with a 7lb weight advantage. The confidence is LOW due to the inherent unpredictability of bumper races and the presence of several unknown quantities.

Suppression Signals: S7 (Going Extreme).

QUARANTINED RACES

The following races have been quarantined by the VÉLØ engine due to unacceptable risk levels. No strike recommendations are issued.

- **Race 1 (15:00) - Betting Handicap Hurdle: Q5 ACTIVE.** A 12-runner handicap on heavy ground creates a high-chaos environment. The race lacks a standout contender with a clear edge, making it a prime candidate for an unpredictable result.
- **Race 2 (15:30) - Betting Handicap Hurdle: Q5 ACTIVE.** With 16 runners on heavy ground, this is another high-chaos handicap. The presence of several horses with inconsistent form profiles (e.g., I'm Slippy, Slurricane) and the significant 8lb rise for westandtogether after a win at a different trip make this a race to avoid.
- **Race 3 (16:02) - Leinster National Handicap Chase: Q5 ACTIVE.** A large field of 16 runners in a premier handicap chase on heavy ground is the definition of a high-risk betting race. The engine notes the presence of Goraibhmaithagat as a danger after a recent win, but the 7lb rise and step up in trip are significant questions. The defending champion Bushmans Pass is also a factor, but the overall complexity and number of variables lead to a mandatory quarantine.
