**SPOTLIGHT VERDICT** **From Me To You** didn't live up to market expectations at Newbury but he should know more this time and it wouldn't be a surprise if he took a major step forward. **Turnstile** showed some promise behind a useful prospect at Thirsk and has claims if he can build on that but there are also several striking newcomers in the line-up. **Indian Land** and **Donegal Rose** need a close look, but the vote goes to **SKY SECRET** who has a lot of speed in his pedigree and represents a yard that won this race last year.[David Moon]

| Ended last season with a game win in Group 3 at Ascot (6f, soft) in October; repeatedly met trouble when only seventh in Saudi Arabia (a race he'd won two years earlier) in February and things didn't really go his way again in a Listed race at Doncaster last month; has possibilities on this drop back in class and his last handicap win was off 1lb higher.                              |                                 |             |                     |             |            |            |            |

| Record of 5-10 for Harry Charlton and his last win was in a conditions event at Kempton (6f, AW) in October; ran without his declared tongue-tie when fourth on stable debut at Southwell in January but he finished down the field in another Class 2 handicap at Newcastle two weeks later; conditions should be fine on this return to turf but he needs to step up again after another break. |                                 |             |                     |             |            |            |            |

| Won four times during a progressive campaign last year but he's come up short in Listed/Group 3 events this spring; seems ideally suited by fast ground but he's still 4lb higher than for his last win and has some work to do back in a handicap.                                                                                                                                               |                                 |             |                     |             |            |            |            |

| Listed winner (5f/6f) for his previous yards and he's run respectably in two 5f handicaps for his new trainer this spring; needs to find some extra spark but he's edging down the weights and this step back up in trip looks a good move.                                                                                                                                                       |                                 |             |                     |             |            |            |            |

| Completed an AW hat-trick when scoring on his handicap debut at Newcastle (6f) last April; held in six subsequent runs but he went close off this mark at Southwell in November and was a creditable third at Newcastle three weeks ago; now returns to turf but he ran well in a fast-ground Listed event last spring and he's still unexposed in this sphere; in the mix.                       |                                 |             |                     |             |            |            |            |

| On lengthy losing but he's a smart handicapper on his day and he returned from five months off with a good third at Newcastle (6f, AW) two weeks ago; should benefit from that run and he remains well treated on his second in the Stewards' Cup last August; interesting contender.                                                                                                             |                                 |             |                     |             |            |            |            |

| Won on stable debut at Southwell (6f, Tapeta) in November and he's posted some solid efforts since then; hard to rule out another good run but this is a step back up in grade and sole turf win was 19 months ago.                                                                                                                                                                               |                                 |             |                     |             |            |            |            |

**SPOTLIGHT VERDICT** This looks tricky but it might be worth siding with **STRIKE RED** who is well treated on his second in the Stewards' Cup last August and returned from a break with an a close third at Newcastle 12 days ago. Second choice is **Fast Track Harry** who has won four of his nine starts and could find more progress back on turf. **Fivethousandtoone** looks interesting off a lower mark back in this sphere, while **Kylian** could go well on this step back up in trip and **Annaf** has claims on his drop back in class.[David Moon]

| Has a better strike-rate on AW than turf but he's capable of useful 6f form on grass and made short work of his rivals at Bath (extended 5f, good) last week; now 6lb higher but this mark isn't beyond him on past exploits; would have welcomed rain but still considered.                                                       |                                 |            |                 |            |           |           |           |

| Had ups and downs since showing decent form earlier in career and was well treated when starting out for this trainer in 2025, winning three of his last four 6f starts on AW and turf; went down only narrowly back on turf (good to firm; headgear left off) in UAE during March and he's of interest now back with former yard. |                                 |            |                 |            |           |           |           |

| Can lead; smart 2yo who began 3yo season on a mark of 102; has shown just humdrum form in three turf handicaps, despite a sliding mark, and was way back behind Justcallmepete at Bath last week; has it to prove now.                                                                                                             |                                 |            |                 |            |           |           |           |

**SPOTLIGHT VERDICT** **Justcallmepete** will be suited by the return to 6f and he doesn't look weighted out of it despite taking a steep rise for his Bath win. The other recent emphatic winner **Wreck It Ryley** looks to have more to prove and preference is for **DAPPER VALLEY (nap)** who looked ahead of his mark for his latest win, on the AW in the autumn, and that's certainly the case on his earlier form. **Ormolulu** and **Under The Twilight** can also have cases made.[Emily Weber]

| Not yet off the mark but she's had two close calls on the AW this year, notably when only just failing to get up at Wolverhampton (6f) in February, against one on the fifth leg of a seven-timer; acts on turf, too, and may well figure back from short break.                              |               |                       |             |           |           |           |

| Well held on AW in November but progressive on turf for new yard previously, following a close second at Yarmouth (6f, good) with wins there (good to soft) and at Bath (extended 5f, heavy); may well do better on good to firm as her dam's best form for this yard came on the same going. |               |                       |             |           |           |           |

| Three wins in 2024, at 7f and 5f; mostly rather underpowered in 2025 and no obvious sign fitting headgear was a help in the autumn, but he's 10lb lower than on reappearance last April so there is handicapping hope.                                                                        |               |                       |             |           |           |           |

| Two AW wins in January, over 6f and 7f; just averagely handicapped now and it's a long time since he's run well on turf but he wouldn't be out of it on past form on grass.                                                                                                                   |               |                       |             |           |           |           |

| 0-31 on turf but he acted perfectly well on the surface in Ireland; first two AW wins for this yard came over 7f but he wasn't bothered by the return to 6f when winning at Wolverhampton 19 days ago; this stiff 6f should suit fine; solid chance.                                          |               |                       |             |           |           |           |

| Lightly raced maiden for two yards but he didn't get the best of runs after a slow start at Bath (first 5f run; good) and may well be ready to play more of a part now back at 6f following a further 3lb drop.                                                                               |               |                       |             |           |           |           |

| Both turf wins on Brighton's sharp track but she made up plenty of ground when a never-nearer third in this race (good) last year and it wouldn't surprise to see her return to form after a low-key Southwell run last time, having gone close there on her reappearance the time before.    |               |                       |             |           |           |           |

| Won 2yo AW maiden; his 3yo season never really got going but he was on a much-reduced mark when runner-up on two occasions (7f) in March; well held on yard debut since, though, and likely best watched back on turf.                                                                        |               |                       |             |           |           |           |

**SPOTLIGHT VERDICT** Recent AW winner **Von Krolock** is not expected to fall short on account of the return to turf and he has a good chance following a successful return to 6f last time out. **CAMELEY DAYS** looks interesting, though, as she was hitting her stride in the autumn and, if her dam's career for this yard is any guide, she should handle good to firm ground and keep improving with racing. Last year's third **Starsong** is also respected, having resumed in good form on the AW last month.[Emily Weber]

**SPOTLIGHT VERDICT** **Superior Choice** was an eye-catching fourth at Newmarket last autumn and is an interesting contender upped to 1m2f on his reappearance. **Act Of Generosity** cost 875,000gns as a yearling and is a striking newcomer for Roger Varian, while the other debutant **Yafreh** also looks the part on paper. However, the vote goes to **HEYZOOM** who sets a good standard on his debut third at Wolverhampton in November and is open to progress over this longer trip on his return.[David Moon]

| Bumper winner and a fair maiden hurdler; 0-6 on the Flat but he was a good third in a Chelmsford handicap (1m6f) in February and the drop to back to 8.6f looked against him at Wolverhampton last time; should get a good tow into this race and he could be dangerous back up in trip.             |                                 |                           |                       |            |           |           |           |

**SPOTLIGHT VERDICT** An open race in which the vote goes to **EVELYN'S PHOENIX** who rallied well to score off a reduced mark on his Nottingham reappearance last Saturday. He remains well treated on his best form and is a big player again on this step back up in trip. Dual turf winner **Silkies Sib** has had productive time on AW since December and he's feared most ahead of **Blackwater Lilly**, who has been in good form over hurdles recently. Others who could be dangerous are **Not So Sobers** and **Happy Chandler**. [David Moon]

| 0-6 but he's reached the frame in two handicaps for his current yard and was beaten less than 2l at Lingfield (7f, AW) last month; hasn't looked entirely straightforward but he didn't get the best of runs last time and he's in the mix back on turf; hood reapplied                                        |                         |                  |            |           |           |           |

| Beaten a nose on handicap debut at Newcastle (7f), after which he was gelded; won on Tapeta and Polytrack in next two starts and was a creditable second in his hat-trick bid at Kempton (7f) three weeks ago; still lightly raced and he's a big player if he can transfer his progress back on turf.         |                         |                  |            |           |           |           |

| Third of nine on his debut at Brighton (6f, good) last May but went backwards from that in two subsequent runs last season; still unexposed and now goes handicapping at this new trip but he needs to raise his game after six months off.                                                                    |                         |                  |            |           |           |           |

| Well held in his first two juvenile runs but he showed clear promise when runner-up in a Lingfield novice (1m, AW) in December; drops back in trip after a break but he pulled hard last time and is open to more progress on this handicap debut; interesting contender with Rossa Ryan booked.               |                         |                  |            |           |           |           |

| Nine-race maiden who has gone the wrong in handicaps and was always in rear on Newmarket reappearance (7f, good; hood added) 11 days ago; mark continues to fall but she needs a big turnaround on this drop back in grade.                                                                                    |                         |                  |            |           |           |           |

| Well held in three qualifying runs (6f) for Eve Johnson Houghton last season; 4-1 favourite on handicap/stable debut over C&D (good) 12 days ago but he was always in rear and finished 15th of 17; has good pedigree and is still early days but he needs to leave that latest form a long way behind.        |                         |                  |            |           |           |           |

**SPOTLIGHT VERDICT** Several have possibilities but the vote goes to **LION OF MALI** who has form figures of 2112 in AW handicaps and is a big player if he can transfer his progress back to turf. **Pretty Danielle** returned from a break with a close call at Lingfield last month and she's feared most ahead of **Circle Of Trust**, who ended last season with a near-miss at Yarmouth. Handicap newcomers **Chielo** and **Great Success** need a close look in the market, while another to consider **Yachtsman**. [David Moon]
