

VÉLØ Multi-Model Consensus — Strike Recommendations

Cheltenham Festival — Thursday, 12 March 2026

Report Generated: 2026-03-12 10:00 GMT | Engines: VELO_ORACLE_PRIME_v10 × VELO_v11

1. Executive Summary: Multi-Model Verdict

This report synthesizes the outputs of two distinct VÉLØ engines to form a unified consensus verdict for the Cheltenham Festival card. The **PRIME** engine (RPD-C tags, Quarantine Gates) provides a robust, data-driven baseline, while the **v11** engine (SQPE Meta-Brain, Kelly Staking, Playbook E) adds a layer of dynamic, context-aware intelligence.

The consensus model produced **2 GOLD**, **2 SILVER**, and **3 BRONZE** tier recommendations, with **no races voided**. This indicates that at least one engine found a viable strike opportunity in every race on the card.

Consensus Tier	Count	Description
🥇 GOLD	2	Both engines agree on the same top strike. Highest conviction.
🥈 SILVER	2	Both engines strike, but on different horses. Value divergence.
🥉 BRONZE	3	One engine strikes, one quarantines. Proceed with caution.
❌ VOID	0	Both engines quarantine. No bet.

2. 🏆 GOLD Tier Strikes (Highest Conviction)

These are the strongest opportunities on the card, where both the data-centric PRIME engine and the context-aware v11 engine have independently arrived at the same conclusion.

Race 3 (2:40) — Close Brothers Mares' Hurdle (Grade 1)

- **CONSENSUS STRIKE: Take No Chances**
- **Combined Confidence: HIGH**
- **PRIME Verdict:** STRIKE (HIGH) | **v11 Verdict:** STRIKE (MEDIUM)
- **Rationale:** A powerful display of consensus. Both engines identify **Take No Chances** as the top strike, overriding the market favourite Wodhoo. PRIME elevates this to HIGH confidence based on full data consensus (Postdata & Topspeed) in a low-chaos race. The v11 engine concurs, also firing a VETP_ECHO doctrine. The v11 engine also flags **Wodhoo** as a potential **LAY**, reinforcing the value proposition of the consensus pick.

Race 7 (5:20) — Kim Muir Challenge Cup

- **CONSENSUS STRIKE: Monbeg Genius**
- **Combined Confidence: HIGH**
- **PRIME Verdict:** STRIKE (MEDIUM) | **v11 Verdict:** STRIKE (HIGH)
- **Rationale:** Another full agreement, this time in a high-chaos handicap. Both engines lock onto **Monbeg Genius**. PRIME issues a MEDIUM confidence strike, trusting the data consensus (Postdata & Topspeed) to cut through the noise of a 24-runner field. The v11 engine is even more bullish, upgrading to HIGH confidence and firing both CHAOS_BLOOM and VETP_ECHO doctrines, indicating it thrives in these conditions and sees the data consensus as a critical anchor.

3. 🥈 SILVER Tier Strikes (Value Divergence)

In these races, both engines agree that a strike is warranted, but they diverge on the top selection. This typically points to a competitive race with multiple value angles.

Race 5 (4:00) — Ryanair Chase (Grade 1)

- **CONSENSUS STRIKE: Fact To File** (PRIME selection)
- **Combined Confidence: HIGH**
- **PRIME Verdict:** STRIKE (HIGH) on **Fact To File** | **v11 Verdict:** STRIKE (MEDIUM) on **Jonbon**
- **Rationale:** A fascinating clash of methodologies. The PRIME engine makes the logical choice, giving a HIGH confidence strike to the defending champion and overwhelming data favourite, **Fact To File**. However, the v11 engine identifies a value edge in **Jonbon** and flags **Fact To File** as a potential **LAY** at his short price. The consensus model defaults to the higher-confidence PRIME selection, but the v11 verdict serves as a crucial warning that the favourite may not have it all his own way.

Race 4 (3:20) — Paddy Power Stayers' Hurdle (Grade 1)

- **CONSENSUS STRIKE: Honesty Policy** (PRIME selection)
 - **Combined Confidence: MEDIUM**
 - **PRIME Verdict:** STRIKE_LOW on **Honesty Policy** | **v11 Verdict:** STRIKE (MEDIUM) on **Impose Toi**
 - **Rationale:** A classic value divergence. With conflicting data, PRIME's RPD-C model identifies the superior underlying profile of **Honesty Policy**. The v11 engine, using its Kelly staking model, finds a mathematical edge with **Impose Toi**. The consensus defaults to the PRIME selection, but the split decision correctly flags a competitive race where multiple horses have a strong chance.
-

4. 🏅 **BRONZE Tier Strikes (Caution Advised)**

These are races where one engine has quarantined the race due to risk, while the other has identified a viable, often contrarian, opportunity. These are higher-risk propositions.

Race 6 (4:40) — Pertemps Network Final

- **CONSENSUS STRIKE: Electric Mason** (v11 selection)
- **Combined Confidence: MEDIUM**

- **PRIME Verdict:** QUARANTINE (Q9 - High Chaos) | **v11 Verdict:** STRIKE (HIGH)
- **Rationale:** The v11 engine demonstrates its strength in chaos. While PRIME quarantines this 24-runner handicap due to conflicting data and high risk, the v11 engine embraces the chaos, issuing a HIGH confidence strike on **Electric Mason**. The v11 CHAOS_BLOOM doctrine fires, indicating the model is specifically designed to find value in such races. This is a pure v11 play against a risk-averse PRIME.

Race 2 (2:00) — Jack Richards Novices' Handicap Chase

- **CONSENSUS STRIKE:** Sixmilebridge (v11 selection)
- **Combined Confidence:** MEDIUM
- **PRIME Verdict:** QUARANTINE (Q8 - Market Chaos) | **v11 Verdict:** STRIKE (HIGH)
- **Rationale:** Another v11 override. PRIME quarantines due to an unstable market (favourite at $\frac{9}{2}$), but the v11 engine's Kelly model finds a significant HIGH confidence value edge in **Sixmilebridge**. This suggests the market may be undervaluing a horse with a strong profile.

Race 1 (1:20) — Ryanair Mares' Novices' Hurdle

- **CONSENSUS STRIKE:** Oldschool Outlaw (v11 selection)
 - **Combined Confidence:** LOW
 - **PRIME Verdict:** QUARANTINE (Q9 - High Chaos) | **v11 Verdict:** STRIKE (MEDIUM)
 - **Rationale:** Similar to Race 6, PRIME quarantines due to the chaotic nature of a 22-runner race with conflicting data. The v11 engine again finds a path through the chaos, issuing a MEDIUM confidence strike on **Oldschool Outlaw**, with its DOMINANT_ENGINE and CHAOS_BLOOM doctrines both firing.
-

5. Multi-Model Summary Table

Race	Time	Consensus Tier	Top Strike	Prime Pick	v11 Pick	Combined Confidence
R3	2:40	 GOLD	Take No Chances	Take No Chances	Take No Chances	HIGH
R7	5:20	 GOLD	Monbeg Genius	Monbeg Genius	Monbeg Genius	HIGH
R5	4:00	 SILVER	Fact To File	Fact To File	Jonbon	HIGH
R4	3:20	 SILVER	Honesty Policy	Honesty Policy	Impose Toi	MEDIUM
R2	2:00	 BRONZE	Sixmilebridge	<i>Quarantine</i>	Sixmilebridge	MEDIUM
R6	4:40	 BRONZE	Electric Mason	<i>Quarantine</i>	Electric Mason	MEDIUM
R1	1:20	 BRONZE	Oldschool Outlaw	<i>Quarantine</i>	Oldschool Outlaw	LOW
